Achievements: Delivered system on time and budget, praised for usability and impact on operational efficiency, recognized for leadership and technical expertise.

02/2022 – 05/2022	**STOCK MARKET APP USING API**
	Major project
	It is quite responsive towards the economic activities taking place in India as well as around the whole world. The project will provide a tool in the hands of the investors to take the decisions regarding their investment. It will also give them the answer that whether it is right time to invest in particular stock or not, and what could be the best time to invest in that share. Project deals with the analysis of different companies of different sectors.
	Here, we want to develop an application by which user are available to get all data of stock market.
	Our API is capable to deliver information like stock price and graph of stock price. In this project we are using ReactJS to create an API which performs allt asks like monitoring of stock market with history.
2022 – 2022	**Tic Tac Toe Mini Project**
	This project is creation and implementation of game using the Visual Studio .Net framework. Basically this is the windows application developed in JAVA language. A game is much more then just its software. It has to provide content to become enjoyable. The software part of the project is not the only one, and it must be considered in connection to all the other parts, The environment of the game, characters, game plays and the artwork.

Interests

Writing poems
I use to write poems on Pratilipi
Application.
